LDT Online: Vyond

Erin Marie Wais-Hennen earned this badge on Feb 18, 2022

Vyond is a web-based application that allows users to design and create short animated “explainer” videos. The power of Vyond is that it has the ability to have characters, animals, and props take action. This paired with the lip-synched messages of any person that you create makes for a powerful tool that can help you with creating both training and educational videos.

Erin Marie Wais-Hennen was the lead author in the creation and development of this badge.

☆☆ Challenges

● Vyond as a tool ▾

Reflect on the various ways that **Vyond** could be used in educational, training, or personal learning environments. From your selected perspective, describe **two** different examples where Vyond could be integrated and used. In both cases, explain why Vyond could positively impact learning.

Use the open text area to submit your reflective response. As a suggestion, you may want to first compose your response in a word processed document, check for all editing that needs to be completed, save your response so that you can access it later, if needed, and then copy and paste your response in the open text area for this challenge.

● Using Vyond ▾

Step-by-step instructions for completing this challenge

- Review these Vyond tutorials:

1. [Creating a Vyond Video](#)
2. [Vyond Tutorial](#)
3. [YouTube channel](#) with specific how-to videos
4. [Vyond Tutorial 2: Making a Character Run](#)
5. [Vyond Tutorial 3: Motion Path Tutorial](#)
6. [Vyond Tutorial 4: Audio Synching](#)
7. [Vyond Tutorial 5: Align and Distribute](#)
8. [Vyond Tutorial 6: Making a Character](#)
9. [Vyond Tutorial 7: Selecting a Background](#)
10. [Vyond Tutorial 8: Branding Your Video](#)

Go to the [Vyond](#) website to get started, and complete each of the following:

- Create an account (you have 14 days to complete and download your video using the free trial).

Create a Vyond video with a minimum of 6 slides. It should be between 1 to 3 minutes in length. Be sure that all media you use in the video is public domain, falls under Fair Use, or is associated with the appropriate Creative Commons license. The video should have the following:

- At least 1 character
- At least 1 animation using a motion path
- At least 1 animation not using a motion path
- Use at least 2 props
- Change the actions of at least one character
- Change the emotions of at least one character
- Use of voice over or text to speech throughout the video
- Use at least 2 different backgrounds, one can be a blank background
- Have a clear message that you wish to convey in your video
- Maintain an audience appropriate tone throughout your video

Upload to YouTube.

- You can export the video then upload it to YouTube. If you don't want it to be public, be sure to make the privacy setting "Unlisted" – you can then submit the URL and only those with the link can see it. Include an appropriate title and description of your video. Select an appropriate category for your video (typically education). Under the advanced settings, either do not allow users to add comments and video responses, or change the setting so they are only allowed with approval.

Criteria for successful completion of this challenge

1. Deliverable has been uploaded in the appropriate format, with all required items described (see below), and are fully accessible by the grader.
2. The Vyond video (viewed on YouTube) demonstrates professionalism in the following ways:
 - All required items/functionalities have been used and demonstrated as specified in the deliverables list below
 - It is professional in quality and is appropriate to the audience.

Deliverables for this challenge

- 1 link to a YouTube video of your Vyond video.
- The following items must be displayed in your video:
 1. At least 1 character
 2. At least 1 animation using a motion path
 3. At least 1 animation not using a motion path
 4. Use at least 2 props
 5. Change the actions of at least one character
 6. Change the emotions of at least one character
 7. Use of voice over or text to speech throughout the video
 8. Use at least 2 different backgrounds, one can be a blank background
 9. Have a clear message that you wish to convey in your video
 10. Maintain an audience appropriate tone throughout your video
